

UNDERSTANDING STRAY VOLTAGE & INDUSTRIAL WIND TURBINES

Saturday April 21st 2018

1pm to 5pm -doors open @ 12:00pm

Covenant Christian School, 6470 Regional Rd 14, Smithville LOR 2A0

Free Event – Donations Graciously Accepted

Speakers: David Stetzer IWT Fingerprint, Tuned Filters, IEEE Standards & Regulations, Hydro Regulations, How Stray Voltage Affects Us All.

Carmen Krogh Preliminary Results: The Vacated Home Research Study

Wind Turbines, Stray Voltage & Harm Reduction

Interactive Panel Discussion with David Stetzer, Carmen Krogh, Alan Whiteley & Barb Ashbee

Dine-With-Us Option: A full course, pay-per-plate offering is available for the evening portion of this event. **Alan Whiteley will be our featured speaker.**

Time: 6pm

Dinner Cost: \$20/plate

Dinner Includes: Salad, Chicken (pancetta cream sauce), roasted potatoes, vegetables, dessert and tea/coffee.

Please email strayvoltagedinner@gmail.com or **905-562-7159** (Mary) to confirm your attendance for the **Dine-With-Us** paid dinner event.

Please RSVP by April 11, 2018

David Stetzer

Dave Stetzer has been an electrician by training, education and experience for over 30 years. In 1975, Dave founded Stetzer Electric, Inc. and remains the president of the company to this day. Since the firm's inception, Dave has specialized in power control in industry, municipalities, and motor control centers. For more than the past decade, Dave has focused more attention on power quality analysis and troubleshooting, which led to the founding of Stetzer Consulting. Dave Stetzer is a senior member of the IEEE (Institute of Electrical & Electrical Engineers), an expert witness in litigation suits in ground currents and power quality, co-author of peer reviewed papers in journals, producer of the documentary 'Beyond Coincidence: The Perils of Electrical Pollution', consultant for Ministers of Health in Kazakhstan, Middle East and Government Health Officials in Russia. He continues to be a sought after, integral contributor in research projects around the world.

Carmen Krogh

Carmen M Krogh is a full time volunteer and published researcher regarding health effects and industrial wind energy facilities. She shares information with communities; individuals; federal, provincial and public health authorities, wind energy developers; the industry; and others. An author and a co-author of peer reviewed articles and conference papers presented at wind turbine noise scientific conferences. A retired pharmacist whose career includes: senior executive positions at a teaching hospital (Director of Pharmacy); a drug information researcher at another teaching hospital; a Director of a professional organization; a Consultant at the Bureau of Human Prescription Drugs (Health Canada); and a Director (A) at Health Canada (PMRA). She is the former Director of Publications and Editor in Chief of the *Compendium of Pharmaceuticals and Specialties (CPS)*, the book used by physicians, nurses, and health professionals for prescribing information in Canada.

Alan Whiteley

Alan J Whiteley has been an attorney for over 30 years, is accredited by the Upper Canada Law Society, and has a consistently high rating with the Martindale-Hubbell Register of Pre-eminent Lawyers. He has been the Editor of University of Toronto Faculty of Law Review, negotiated government defence contracts, and served as counsel to the Security Intelligence Review Committee (Canada). His experience includes serving as counsel for the arbitration of international commercial disputes as well as having served as counsel for internationally-based aerospace and airport organizations. He is legal counsel for the County Coalition for Safe and Appropriate Green Energy (CCSAGE) based in Prince Edward County, and in this capacity has undertaken to challenge various aspects of Ontario's Green Energy Act via a Judicial Review. Mr Whiteley will be participating on the panel discussion and offering observations on the hurdles to be overcome to obtain legal remedy from experiencing negative effects of IWTs.

Barb Ashbee

Barb and her husband were happy and healthy before a wind turbine project started up around their home causing serious adverse health effects that drove them to leave. Testing in their home showed out of compliance noise, infrasound and electrical pollution. It was a battle to get any meaningful information or assistance from the government. After hiring a lawyer, they settled with the company, were able to relocate and their symptoms subsided after moving. Almost 10 years later, the anger and dismay at what the government is doing to citizens has not lessened as the toll rises. Barb continues to advocate for resolution for victims impacted by wind energy and has communicated with and attended countless government and community meetings over the years.
